

Name: Brahian Osborny Ramon de la Rosa

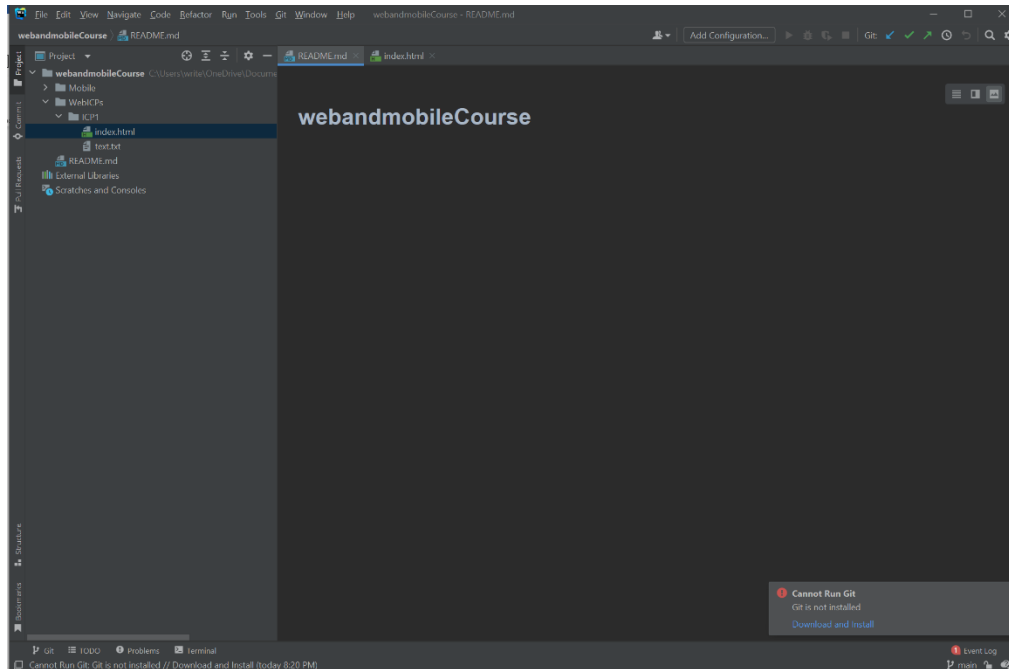

Student ID: 16317596

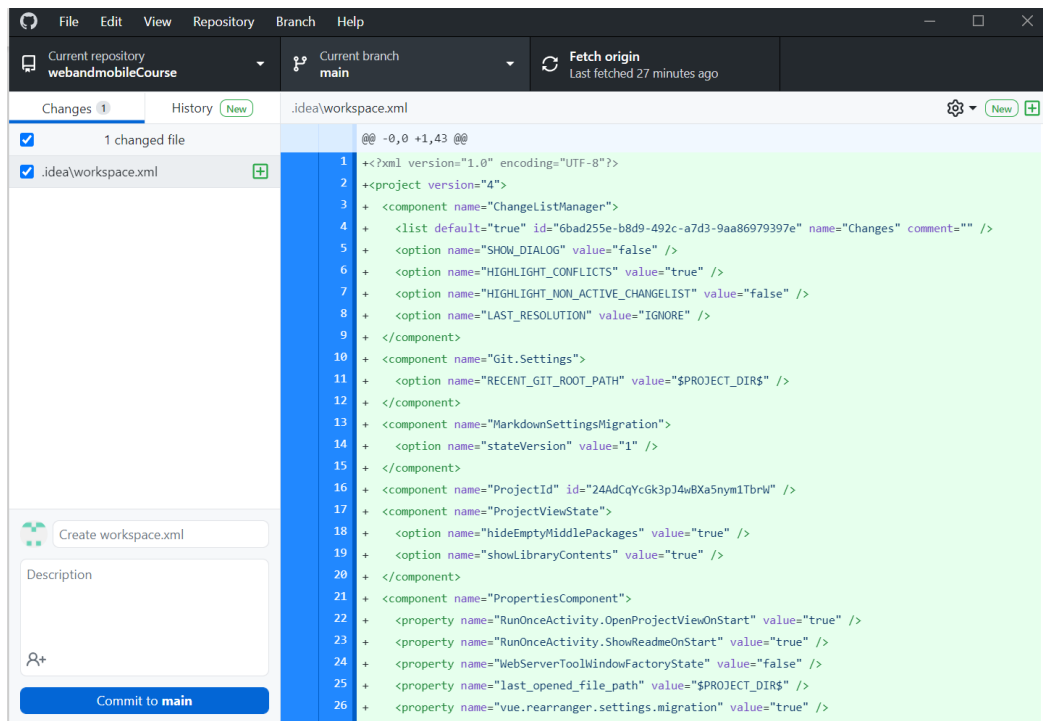

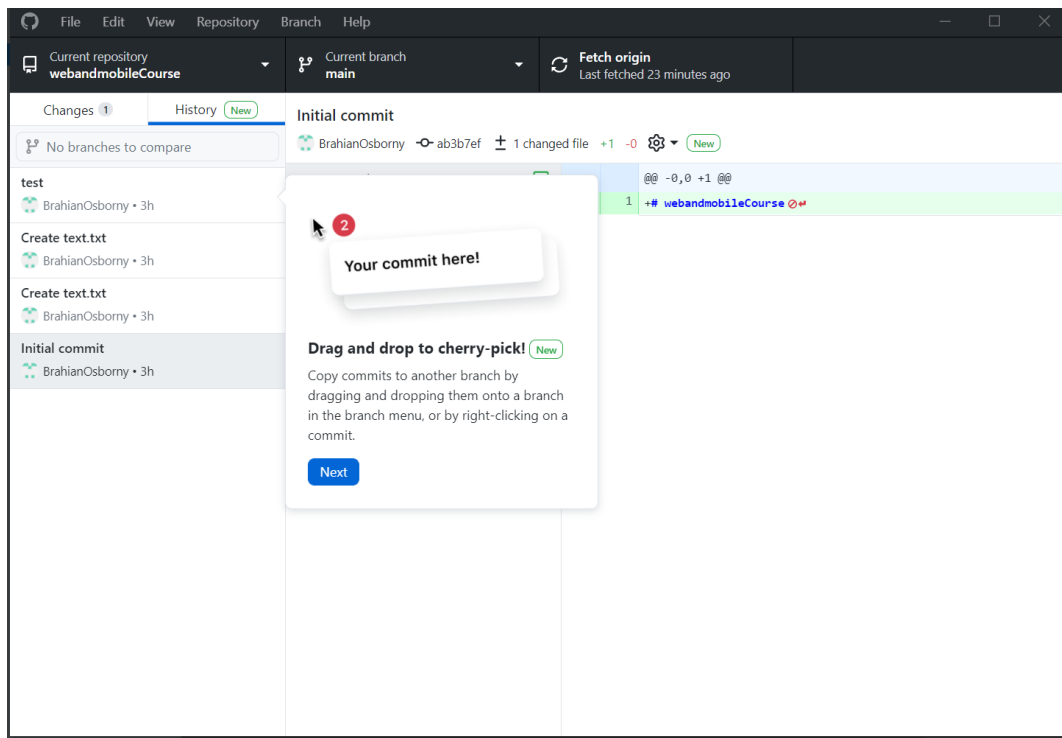

Assignment: ICP1

Subject: Report

In order to get this ICP done, I started downloading two applications, these applications are as follows: WebStorm and GitHub desktop. When I first downloaded WebStorm I could not use it because I did not have the license, so I proceeded to register as student to be able to use the educational license and log in the WebStorm framework which worked out well, shortly after I logged in GitHub created the repository and logged in the desktop version, created the folder for Web and Mobile programming then cloned all of it to the desktop version, after creating the index submitted it so that it becomes available in online version.

Screenshots are provided below:
